

URUGUAYAN FISH

REPÚBLICA
ORIENTAL DEL URUGUAY

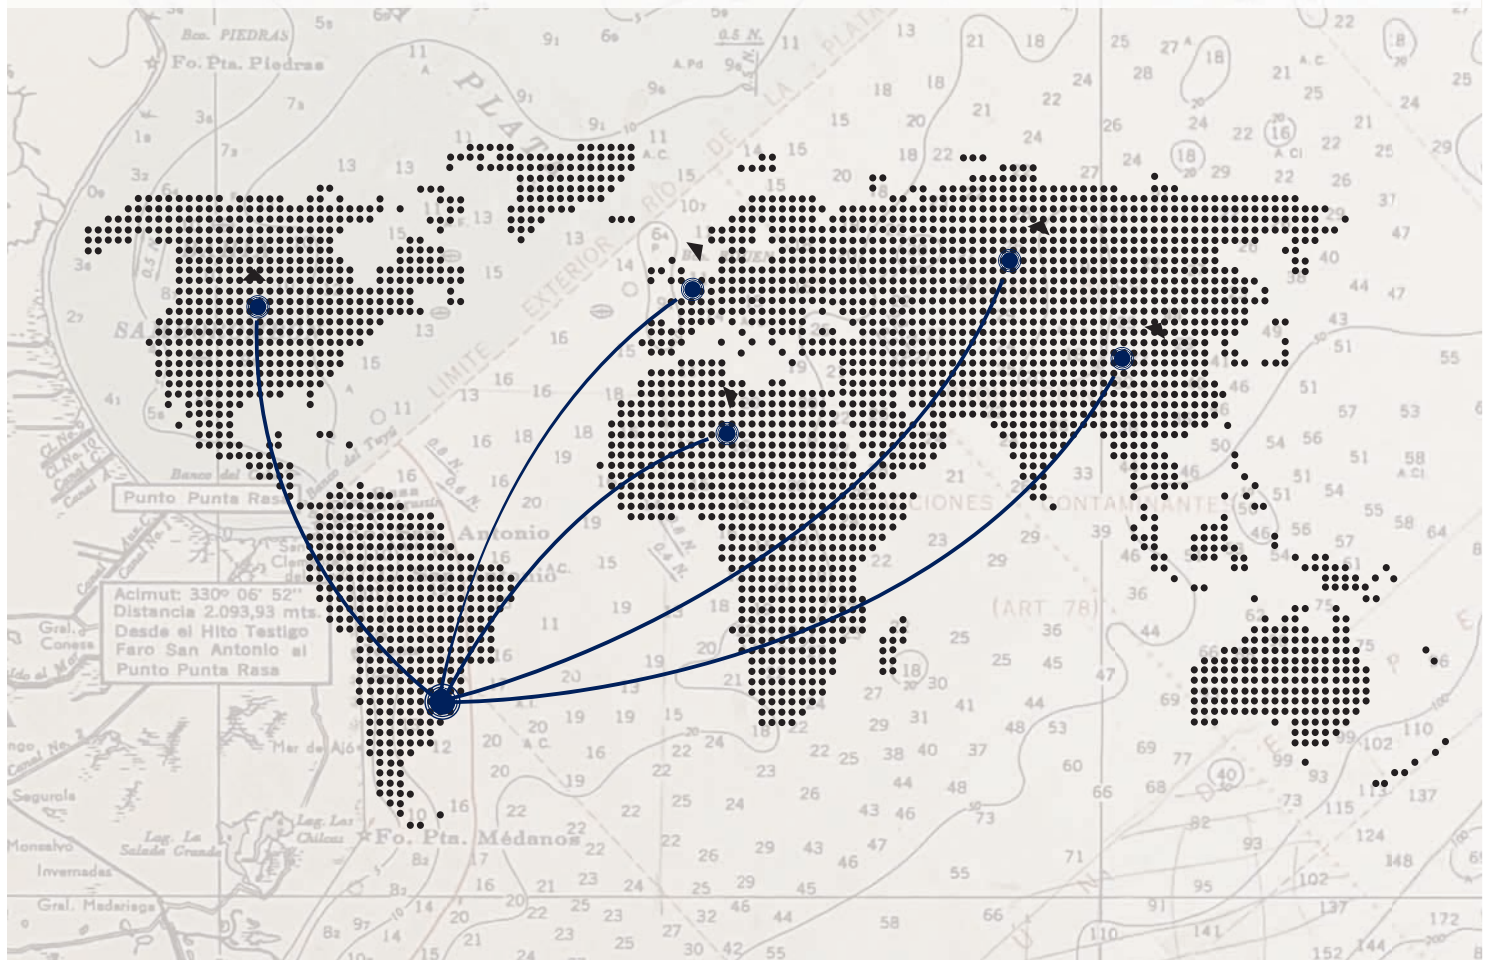

URUGUAY

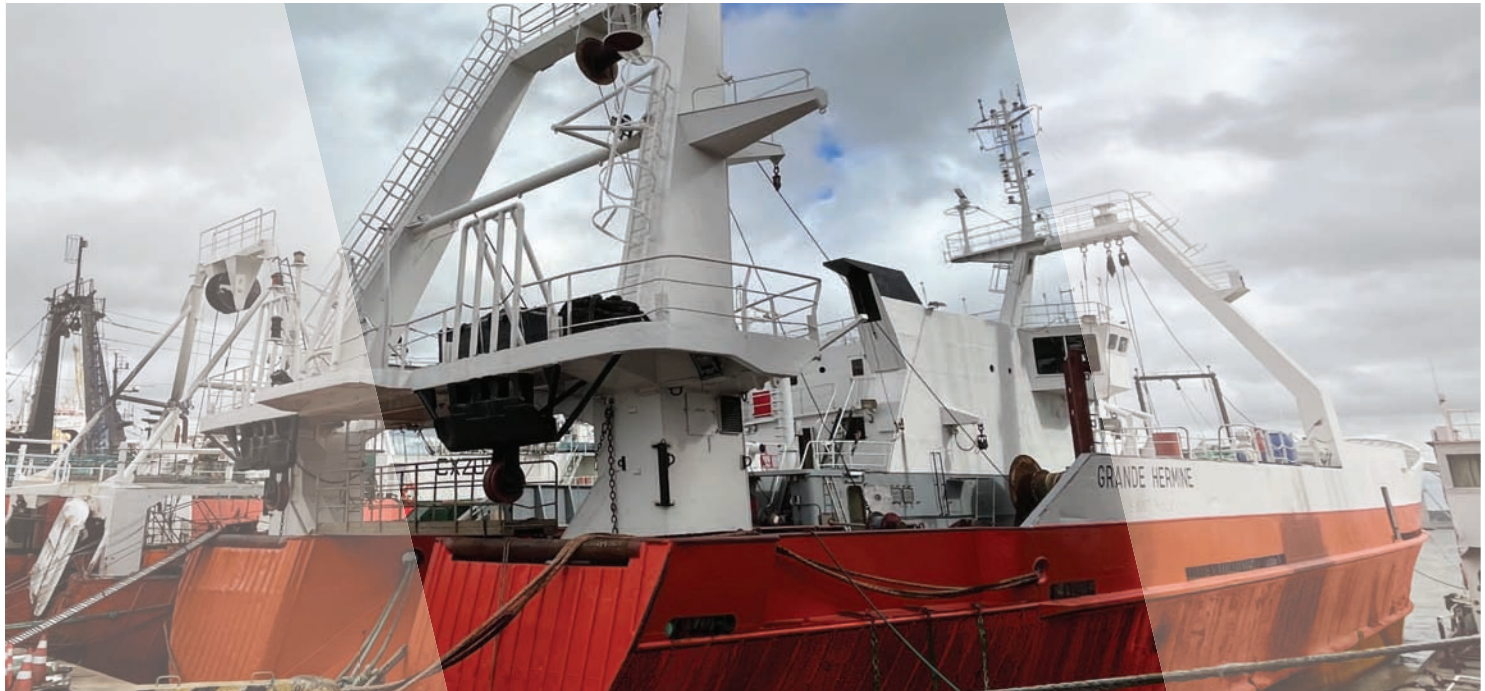

Located in the estuary of the Rio de la Plata., surrounded by the cold waters of the South Atlantic Ocean, is where our company has forged and grew since 45 years ago.

With our own fleet of fishing boats and our modern factory we can ensure the excellent quality of our products.

Our Factory vessels are dedicated to the deep sea fishing and onboard processing of mainly Hake, Squid and Hoky; while the rest of our fleet, coast fishing vessels, main capture is Yellow croaker, Seatrout, and Kingweak fish.

Our factory is located in front of the Montevideo Port, which is also the main connection to the World Wide Market.

SEA FROZEN

Our deep sea trawlers factory vessels are dedicated to catch of Hake, Squid, Hoky, Rouget, Hawkfish and Notothenia.

All vessels have their correspondent HACCP approved by the FDA and the EEC.
